MLC Plus 100

MEDIALINK PLUS CONTROLLER

- Manage, monitor, and control AV devices using a standard Ethernet network
- Fully configurable using Global Configurator Plus or Global Configurator Professional
- Two bidirectional RS-232 ports
- Two relays for controlling room functions
- One IR port for connecting up to two emitters
- One digital input
- Remote volume control port for Extron MPA Series and select XTRA[™] Series amplifiers
- Volume control knob with LEDs for visual feedback
- Supports Power over Ethernet
- Supports Ethernet-controllable devices:
 - Up to 4 devices with GC Plus
 Up to 8 devices with GC Pro
- Section 508 Compliant

The MLC Plus 100 is an easy-to-use, pushbutton controller that is used for common AV room functions such as display on/off, input switching, volume, and Ethernet control of AV devices. This fully-configurable controller features a sleek look, six backlit buttons, and a multi-function volume knob. It is ideal for a broad variety of AV environments, including classrooms and conference rooms.

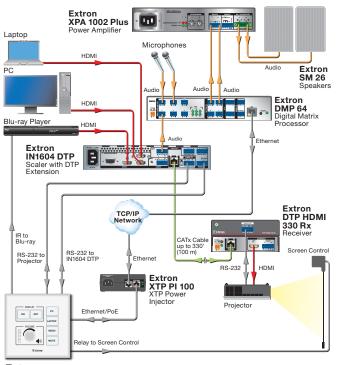

DESCRIPTION

The **MLC Plus 100** is a sleek Ethernet controller designed for handling common AV functions such as power, input switching, volume control, and Ethernet control of AV devices. The faceplate hides the mounting screws and, combined with its rounded corners and beveled edges, gives the controller a refined, stylish appearance. Along with the six customizable and configurable buttons, the MLC Plus 100 features a remote volume control port for Extron MPA Series and select XTRA[™] Series amplifiers. Power over Ethernet - PoE allows the MLC Plus 100 to receive power and communications over a single Ethernet cable. It mounts in a twogang junction box, and includes black and white faceplates.

The MLC Plus 100 is configured using Extron Global Configurator Plus or Global Configurator Professional software. It also integrates seamlessly with Extron's award-winning GlobalViewer[®] Enterprise software for complete AV resource monitoring, management, and control over a computer network. The Extron control App and Extron Control for Web is supported by this controller if a secondary point of control is required.
